

Nantarawa Folding Container Earthquake-resistant Type

WORKING PRINCIPLE

Overview

Earthquake-resistant design: The 20FT Steel Portable Container is designed with a sandwich panel that provides excellent resistance to seismic activity, making it a suitable option for areas prone to earthquakes. In the aftermath of an earthquake, the most urgent human need is shelter—a safe space to regroup, recover, and begin to rebuild. Traditional construction, however, can take months or even years, a timeline that is simply untenable for displaced families and emergency responders. This is where a. The folding container house is ready-made after leaving the factory. It is made of galvanized color steel, which is stable and firm. Folding structure greatly reduces transportation space and cost. The frame of the house is usually made. Built with a heavy-duty steel frame base, insulated metal wall panels, and a galvanized steel roof with waterproof coating — designed for long-lasting durability in all weather conditions. PORTABILITY & SETUP - Modular / prefab home shipped in panels that assemble quickly; portable container house. Expandable container homes are innovative housing solutions built using standard shipping containers, offering advantages such as rapid construction, cost-effectiveness, and environmental sustainability. With just a few simple steps, we can add an entire new room! This could be a bedroom, office. 1.
