

New Energy Rare Earth Energy Storage Company

Overview

By building a complete ecosystem of "materials-devices-applications," the company achieved breakthroughs in the international market and explosive growth in domestic performance in 2025, providing a unique "rare earth solution" to overcome the bottlenecks in hydrogen. By building a complete ecosystem of "materials-devices-applications," the company achieved breakthroughs in the international market and explosive growth in domestic performance in 2025, providing a unique "rare earth solution" to overcome the bottlenecks in hydrogen. RENO, Nev. 05, 2025 (GLOBE NEWSWIRE) -- American Clean Resources Group Inc. (OTC: ACRG), a critical minerals processing company, announced the formation of Nexus 7 Elements LLC, a joint venture with Energ4 Mining Company LLC to commercialize rare earth element and mineral recovery technology. In March, at Beijing's Hydrogen & Fuel Cell Expo, the firm unveiled its "Beixi Hydrogen" product line: alloy powders, storage tanks, modular devices, and even hydrogen-powered forklifts—drawing immediate industry attention. By May, 1,800 units of solid-state storage devices had been sold in Jiangsu. In May 2024, the Biden administration imposed a 25 percent tariff on Chinese rare earth magnets starting in 2026, marking the first time these components had been targeted under Section 301. The move hit sintered neodymium-iron-boron (NdFeB) magnets, vital for EVs and wind turbines, highlighting. On September 18, while the hydrogen energy industry focused on hydrogen production and fuel cells, China Northern Rare Earth Hydrogen Storage Company took a different approach. The company is scaling pilot production in Finland with public and strategic backing.

New Energy Rare Earth Energy Storage Company

China Northern Rare Earth Hydrogen Storage Company: Breaking the

The rise of China Northern Rare Earth Hydrogen Storage Company signifies that China's hydrogen energy industry is advancing toward core technology independence, diversified application ...

New 'Project Vault' minerals stockpile is 'first step

The new "Project Vault" critical minerals stockpile launched by the White House and the U.S. Export-Import Bank is "absolutely" needed, but it represents just the first step of many to

Northern Rare Earth Hydrogen Storage Subsidiary Bets Big on Solid ...

Chinese company Northern Rare Earth pivots to solid-state hydrogen storage. Achieved 351% year-on-year sales growth. Achieved 217% profit increase. The subsidiary strategically ...

ACRG and Energ4 Launch Commercial Venture to Accelerate U.S.

ACRG establishes regional processing centers that use advanced technologies to recover gold, silver, rare earth elements and critical minerals from tailings and other feedstocks. The

Rare earth stocks: Trump launches critical minerals stockpile

The move higher for U.S.-listed rare earth miners comes shortly after President Donald Trump announced the launch of a strategic minerals stockpile. Known as Project Vault, the proposal ...

Rare Earths Stocks: 9 Biggest Companies , INN

Learn about the biggest US, Canadian and Australian rare earths stocks developing supply chains for clean energy and rare earth metal magnets.

ACRG and Energ4 Launch Commercial Venture to Accelerate U.S.

Beyond mining tailings, the joint venture

positions ACRG to process coal ash, fly ash and legacy coal dumps, feedstocks abundant in the eastern United States, especially Appalachia.

Nordic Nano Group Oy

Nordic Nano develops non-toxic, rare-earth-free nanocarbon solar films and printed solid-state salt batteries for electric vehicles, stationary energy storage, building-integrated PV and ...
