

New Energy Storage Engineer

Overview

Energy Storage Engineers are specialized engineers who primarily work in the renewable energy sector, though they may find roles in a variety of industries. Leverage your professional network, and get hired. See different job titles describing similar work, including Battery Systems Engineer, Energy Systems Engineer, Power Systems Engineer, or Grid Storage Engineer. Apply your skills in multiple industries, such as electric vehicles, solar-plus-storage, utility grid modernization, aerospace, or defense. Energy Storage Solutions focus on designing and optimizing energy storage system technical solutions for customers in North America, addressing the pain points. Burns & McDonnell is searching for engineers with a passion for renewable energy who can assist with the design and execution of complex. Looking to get into the energy technology industry?

Battery Academy offers free, flexible online training pathway for battery technology! Scroll to learn more and enroll! Gain foundational, focused training designed to equip you with the skills, knowledge, and experience employers in the energy. On J, NSF issued an Important Notice providing updates to the agency's research security policies, including a research security training requirement, Malign Foreign Talent Recruitment Program annual certification requirement, prohibition on Confucius institutes and an updated FFDR. 2025 has been a challenging year for renewables. The new tax law, commonly referred to as the One Big Beautiful Bill Act, rolled back many clean energy tax credits and imposed new restrictions, pressuring early-stage wind and solar pipelines. Wind and solar investments in the first half of 2025.
