

# New Energy Storage Enters the Industry

## Overview

---

Nearly a decade ago, when the energy storage market was in its infancy, an industry organization set a dreamy goal: By the end of 2025, the U.S. would deploy 35 gigawatts of batteries connected to the grid. 7GW, representing an 85% year-on-year rise. Lithium-ion companies have come out as the top-rated suppliers on a new long-duration energy storage (LDES). UK energy storage company Zenobe has decided to enter the German market and is looking to acquire battery energy storage systems (BESS) of no less than 1 GW/4 GWh by 2030. Canadian Solar Inc (NASDAQ:CSIQ) said on Thursday its e-STORAGE unit will equip two standalone battery energy storage projects. Installations passed 100 GW for the first time – a milestone achieved even as some of the largest energy markets grappled with significant policy shifts. China, for instance, removed the mandate to install storage with new renewables.
