

New google street view 2020

Overview

The updated version of the Street View app allows users to capture images using ARCore — the same AR technology Google uses for its own Live View orientation experiences in Maps, which helps phones “see” various landmarks to help users get their bearings. 360 imagery helps you know where to go and what to expect when traveling. Explore world-famous landmarks, galleries, and museums right from your device, or turn the clock back with Street View historical imagery to see how a location has changed over time. Google claims that some pictures go as. Find local businesses, view maps and get driving directions in Google Maps. Google Maps is getting sharper satellite imagery and more Street View content, while Google Earth will soon let users access more historical imagery.
