

One UPS host can connect two battery cabinets

Overview

The short answer is yes, it is generally possible to connect multiple UPS reserve battery packs together. To make a redundant static uninterruptible power supply (UPS) configuration such as pictured below, I have seen warnings in UPS manuals that each UPS is to be connected to its own battery bank. But is it okay that for this configuration I'd remove the battery of the second UPS, and put a jumper so. NOTE: The modular battery cabinet can only be installed remote to a UPS for external batteries. Contact Schneider Electric for installations with a longer distance. 36V, and check if the positive and negative leads are correctly connected. Each UPS module may have its own battery cabinet(s), or may share. If more than one UPS is used and are hard wired to distribution panels, they are to be kept as separate systems. Let me see if I can find some photos.

One UPS host can connect two battery cabinets
