Select the plus sign in the rows below for more. Photovoltaic bracket hoisting specifications as part of the structure of the building (called B-roof, tilt up, or open structure mounting applications). Therefore its optimization may have different approaches. In this paper, the mounting system with a fixed tilt angle has been studied. The new version of C-FIX with optimised start times allows the design of fixings in masonry after the specifications of the ETAG. The general materials are aluminum alloy, carbon steel and stainless steel. Standards are norms or requirements that establish a basis for the common understanding and judgment of materials, which is no less than 10% smaller than the estimates.
