

Photovoltaic panels solar energy concept stocks

Overview

In this article, we cover nine of the best solar stocks to buy in 2025, all listed on major U.S. exchanges. We aim to give you a clear, beginner-friendly view of each company, why it qualifies, and what the risks are. The solar energy industry builds and installs devices to capture energy from the sun and convert it into electric power. With the levelized cost of energy for utility-scale solar down around \$30 to \$60 per megawatt-hour, solar remains one of the least expensive energy sources. The solar industry faced a 24% year-over-year decline in second-quarter 2025 installations, with all segments except commercial solar shrinking due to unfavorable federal policies and trade challenges.
