

Please wash the photovoltaic panels before use

①

②

Overview

Scrub the panels with a soft brush and gentle cleaner, like dish soap and water. Turn off the solar panel system. To keep your solar panels working effectively, it's a good idea to wash them once or twice a year or whenever they're particularly dirty. In this article, we'll teach you everything you need to know about how to clean solar panels manually, when and how often to clean solar panels, and why solar. When cleaning solar panels, it is recommended to use calcium-free water, such as distilled or softened water. Hard water contains minerals like calcium and magnesium, which can leave deposits on the solar panels and reduce their energy output. Rain often removes light debris, but dust, pollen, bird droppings, or snow buildup can reduce output over time.
