

Ranking of wind power generation leaders

✓ TELECOM CABINET

✓ BRAND NEW ORIGINAL

✓ HIGH-EFFICIENCY

Overview

The countries with the largest market volume for new wind turbines were in 2024: China (86,7 GW), Brazil (5,4 GW), United States (4,2 GW), India (3,4 GW), Australia (3,3 GW), Germany (3,2 GW) and the United Kingdom (2,2 GW). Long-term developments: Growth continues but. China is the largest producer of wind power in the world, having generated 466. 4 TWh produced during the year. ranks second with 153,152 MW but shows no growth from 2023 to 2024, similar to Germany, Spain, and the UK. [2] Since 2010, more than half of all new wind power was added outside the traditional. Here is the list of world's leading renewable energy generating countries in the world. This clean source produces electricity without emitting greenhouse gases or pollutants and harnesses natural resources that will not run out.

Ranking of wind power generation leaders

Wind power by country

Wind power is used on a commercial basis in more than half of all the ...

Global Statistics

The world's installed wind power capacity now meets well over 10% of global electricity demand - and much more than nuclear power. More than 30 countries now have a share of wind ...

Top 10 Nations Leading in Wind Energy

To achieve global decarbonisation goals in time, the International Energy Agency says annual wind capacity additions need to increase from ...

Wind electricity generation

Wind electricity generation, billion kilowatthours, 2022: The average for 2022 based on 189 countries was 11.16 billion kilowatthours. The highest value was in China: 762.67 billion kilowatthours and the ...

Top 10: Wind Power Companies , Energy Magazine

To achieve global decarbonisation goals in time, the International Energy Agency says annual wind capacity additions need to increase from around 115 GW in 2023 to 340 GW in 2030. ...

Ranked: The Top Countries by Wind Power Capacity in 2024

Below, we show the world's leading countries in wind power capacity in 2024: With nearly 522,000 MW of wind turbine capacity, China by far is the global leader. Even more ...

Top 10 Nations Leading in Wind Energy

Here is the list of world's leading renewable energy generating countries in the world. 1. China is a global leader

in wind energy generation. The country had a significant installed capacity ...

Top 10 Countries Leading the Wind Energy Revolution

Countries worldwide are innovating, investing, and expanding their wind energy capabilities, setting the stage for a cleaner, more sustainable future. Here's a look at the top nations ...

Country Rankings

This dashboard ranks countries/areas to their renewable energy power capacity or electricity generation. The data can be further refined based on region, technology or year of interest.

Wind Power by Country 2026

The United States is the second-largest producer of wind power, and generated 341.40 TWh of wind power in 2021, equal to just over 21% of total global

production. Together, China and the United ...

Top Wind Energy Producers: Global Leaders & Statistics by Country

This table illustrates the wind energy capacity of various nations, showcasing the leaders and their impact on the renewable energy landscape. China tops the list with an astounding 328 GW, ...

Wind power by country

Wind power is used on a commercial basis in more than half of all the countries of the world. [3] Denmark produced 58% of its electricity from wind in 2023, a larger share than any other country.
