

Resort uses off-grid solar-powered 100-foot container

Overview

Whether you are running a luxury bungalow, a backpacker lodge, or an entire resort village, a mobile solar container gives clean, silent, and remarkably low-maintenance power—minus the logistical inconvenience of fuel shipments. Let's walk through how to do it, step by step. Hybrid inverters convert DC to AC and manage the flow of power between solar panels, batteries, and the resort's loads. The power system supports dozens of guests and a staff of 150. NewGrid oversaw the implementation of approximately 2 megawatt hours of lithium. Our off-grid shipping container homes offer a unique opportunity to create a self-sufficient, personalized haven designed to fit your needs. These prefab solutions make unplugged living. Let's talk about why building your resort off-grid with solar power is not just cool, it's smart and sustainable. If you haven't visited some of NewGrid's resort projects, here's the tl;dr version! Picture this: an eco-adventure resort thirty miles off Panama's Pacific Coast, running entirely on. RPS supplies the shipping container, solar, inverter, GEL or LiFePo battery bank, panel mounting, fully framed windows, insulation, door, exterior + interior paint, flooring, overhead lighting, mini-split + more customizations! RPS can customize the Barebones and Move-In Ready options to any design.
