

Should I buy solar panels for outdoor energy

Overview

Solar panels are worth it for many homeowners, depending on local energy costs, geographic location, roof pitch, and funding method. Some or all of the mortgage lenders featured on our site are advertising partners of NerdWallet, but this does not influence our evaluations, lender star ratings or the order in. Solar panels are an upfront investment that can save homeowners a significant amount of money in energy costs over the life span of the panels. With current tax credits and incentives, the average payback period for solar panels is between six and 10 years. In other words, you can recoup the money. Can solar panels significantly reduce your energy bills?
