

# Should I install tiles first or solar panels first

## Overview

---

Consider five key factors when choosing between solar tiles and panels: Initially, panels require simpler installation on existing roofs while tiles need full roof replacement. Second, panels deliver higher efficiency at 15-22% versus tiles at 10-20%. Third, panels cost considerably less at \$3/watt. Solar tiles, championed by companies like Tesla, promise seamless roof integration and enhanced curb appeal—albeit at a premium price point. For homeowners weighing these options, the decision extends beyond mere energy production to consider installation complexity, long-term durability, and. My advice would be, bearing in mind I have not seen the condition of the existing roof, is to re tile and felt first, as from previous experiences they are very awkward to get to and removing them will be a lot off work and will have to be removed by professional installer. Thanks to the two-year-old Inflation Reduction Act, homeowners are entitled to a 30% tax credit on installing roof-top solar panels. My journey to understand.
