

Solar Photovoltaic Power Generation System Cost

Overview

Solar panels can lower your electricity bill by 75% or more, but the upfront investment is significant. Most homeowners spend between \$12,600 and \$33,376 to install a complete residential solar system in 2026, with the national average at \$19,873 before incentives. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U. solar photovoltaic (PV) systems to develop cost benchmarks. These benchmarks help measure progress toward goals for reducing solar electricity costs. For many homeowners in 2025, a whole-house solar generator is the best way to protect their family from blackouts caused by natural disasters like wildfires and blizzards and slash or eliminate electricity bills. This work has grown to include cost models for solar-plus-storage systems.
