

Solar inverter fault code 06

Overview

Disconnect all power source, test the DC to AC Mosfet (or IGBT) and related drive resistance. If still problem, go for step 2. Disconnect all power source, and open the top cover, take out the main board, place the main board on the insulated tables, connect with DC power source (Suggest. How to reset overload fault-06 on the MPPT inverter/ controller?

I have a MPPT inverter/ charger Model: PIP 812LV-MS. Since I have my van back after some electric work it shows 06- overload fault on the inverter. Is the inverter. I trying to repair inverter 3k shows error code 06 I checked all transistors in section and out section with drivers all parts is ok. I checked most of parts in main board i didn't see any abnormal parts Any suggestions Thanks in advance. more We are an professional in repairing of solar inverters so you can parcel your inverter for repairing like company base. Error indicators typically manifest as status codes on the inverter display, LED status indicators, and status messages in the iSolarCloud monitoring portal. Sungrow inverter systems.

Solar inverter fault code 06

 TAX FREE    

ENERGY STORAGE SYSTEM

Product Model
HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWH/115KWH

Battery Cooling Method
Air Cooled/Liquid Cooled

Error code 06

Fault code 06 for 1-3 kVA models is "output voltage abnormal". So as Glodi says above, check the 8 chips near the processor, especially the TL074 op-amps, and surrounding parts. Some ...
