

Solar made of glass balls

Overview

Shaped as a sphere that functions like a magnifying glass, this spherical solar collector concentrates the incoming diffuse sunlight on its surface through the spherical lens to a collector containing solar panels inside the device, converting the solar energy into electricity. A German architect with a clear artistic flair has applied his incredible talent to the creation of a crystal ball that generates power. It sounds like something out of a traveling carnival, but the beta. ey, as it's been named by its creator, is functional as well as eye-catching. Why?

Because it is an. The company claims these spheres could achieve 60 times more energy output than solar panels in natural or artificial light. Price and other details may vary based on product size and color. Mason Jar Solar Fairy Light Lantern Beautiful Hanging Christmas Ornaments, Balls, Festive Holidays. Quart size Check out our outdoor solar glass balls selection for the very best in unique or custom.

Solar made of glass balls

The Solar 'Magnifying Glass'--Spherical Solar Collector
