

Solar panel prices are low

Overview

In 2025, the average price of a solar installation is about \$21,816 before any incentives are applied. Anything you can do to lower the cost goes a long way to making it easier to take the leap and start paying your utility company less money each month. Cutting corners can help you save money, but you don't want to. Average price of solar modules, expressed in US dollars per watt, adjusted for inflation. Data source: IRENA (2025); Nemet (2009); Farmer and Lafond (2016) – Learn more about this data Note: Costs are expressed in constant 2024 US\$ per watt. Global estimates are used before 2010; European market. Solar panels cost about \$30,500 on average—but often pay for themselves several times over through 25-30 years of electricity savings. Why trust EnergySage?

If you've been putting off solar because of sticker shock, this might change your mind: Most homeowners save \$37,000 to \$154,000 over 25. NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. This work has grown to include cost models for solar-plus-storage systems. Solar panels also allow you to run limited low watt electrical equipment without a power hookup.
