

# Solar photovoltaic panel installation time

## Overview

---

Between design work, permitting, installation, and final connections and inspections, you'll likely wait 60-90 days before you can start powering your house with solar energy. The good news is that installing the panels on your roof only takes a day or two. "Typically we say it's a 60-to-90-day timeframe," said Bryce. Solar installation is often thought of as a one- or two-day project, but the reality is more involved. While panels may only be on your roof for a short time, the full process includes planning, design, permitting, inspections, and utility approvals — all of which are essential for safety and. **Timeline Reality:** The complete solar installation process typically takes 60-120 days from consultation to activation, with permitting being the longest phase (30-45 days) rather than the actual installation (1-3 days). Let's take a closer look at this process and provide you with a timeline, including a detailed description of each step.

## Solar photovoltaic panel installation time
