

Solar power generation status query

Overview

The USPVDB Viewer, created by the USGS Energy Resources Program, allows users to visualize, inspect, interact, and download the most current USPVDB through a dynamic web application. The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar photovoltaic (PV) and solar thermal facilities, as well as country-aggregated distributed (<1 MW) solar PV data. The utility-scale data covers all operating solar farm phases with capacities. — 150MW solar * project in Dodge County, GA (Southern Company). photovoltaic (PV) facilities with capacity of 1 megawatt or more. Begin your research with our simple and straightforward FERC Electric Quarterly Reports (EQR) and EIA Bulk Data search tools. We've aggregated all available U. electric generation data and sales data into one easy to use and convenient location. Filter projects in the queue by status, fuel type, and/or state. "Queue Cap Tracker" tracks submitted applications and regional caps. Service Agreements under MISO Tariff. JTIQ. This page provides current information on Generation Resources, including forecast and actual generation for Wind and PhotoVoltaic (Solar) Generation Resources; Resource Outages; Reliability Unit Commitment (RUC) constraints; Reliability Must Run (RMR) Resource deployments; Fuel Type; and aggregate.

Solar power generation status query

The U.S. Large-Scale Solar Photovoltaic Database

It includes corresponding PV facility information, including panel type, site type, and initial year of operation.

Generator Interconnection Queue

Project Status Tool Filter projects in the queue by status, fuel type, and/or state.

Global Solar Power Tracker

The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar photovoltaic (PV) and solar thermal facilities, as well as country-aggregated distributed (<1 ...

Latest Interconnection Queue Requests with daily data updates

An interconnection queue is a list of power generation and transmission projects that have requested to connect to the electric grid. The queue is managed by the grid operator, which is ...

GridInfo , Comprehensive Electricity Data

GridInfo strives to provide a

comprehensive database of power plant and utility net electricity generation across the United States. All data on our website is public information, and it is sourced from a ...

Solar Resource Data, Tools, and Maps , Geospatial Data Science , NLR

Solar Resource Maps and Data Find and download resource map images and data for North America, the contiguous United States, Canada, Mexico, and Central America. Solar Supply ...

Live Solar Generation Data , LG& E and KU

Access comprehensive historical generation data. A measure of electrical power equivalent to 1.34 horsepower or 1,000 watts. As an example, a typical toaster requires 800-1,400 watts to operate. Our ...
