

Solar power station releases thousands of sheep

Overview

BUCKHOLTS, Texas (AP) — On rural Texas farmland, beneath hundreds of rows of solar panels, a troop of stocky sheep rummage through pasture, casually bumping into one another as they remain committed to a single task: chewing grass. The booming solar industry has found an unlikely mascot in sheep as large-scale solar farms. IOLA — Cattle grazed, as they have for decades in this rural area 30 minutes east of College Station, in an open field on one side of the dirt road leading to the Blue Jay solar array. In Milam County, outside Austin, SB Energy operates the fifth-largest solar project in the country, capable of generating 900 megawatts of power across 4,000 acres (1,618 hectares). 8 seconds ago Tina Casey Tell Us What You're Thinking!
