

# Spanish pumped storage power station power generation

## Overview

---

With a capacity of 1,800 MW, it can store up to 58 million kWh, equivalent to the daily consumption of 10 million users. The plant will utilise surplus solar energy to pump water, ensuring a 100% clean process. Construction will begin in 2025, creating around 3,000 jobs over six. Iberdrola Spain has begun commissioning the 225 MW Valdecañas pumped hydro energy storage (PHES) plant which is hybridized with a 15 MW / 7.5 MWh battery energy storage system. In addition, the construction of these plants helps to stimulate the economy by generating a large number of jobs and helps to fix the population in the surrounding. The project for the construction of the new Alcántara II reversible hydroelectric pumping station, located in Alcántara (Extremadura, in southwest Spain), has obtained a favourable Environmental Impact Statement (EIS), according to a resolution of the Ministry for Ecological Transition and the. Spain is facing many challenges trying to integrate a large amount of renewable energy (wind and solar) into real-time dispatch of its power generation to meet electricity demand.
