Which One Is Better? A 110 Or 220 Mini Split?
Mini Split Power and Wire Size FAQs
When choosing a mini split system, one of the most important decisions is whether to go with a 110V or 220V model. The key difference between the two lies in the power requirements, which directly affect the system's performance and installation process. A 110V mini split typically supports smaller systems, usually up to 12,000 BTUs, making it idea See more on pickhvac
