

State-supported solar power generation

Overview

This toolkit presents a high-level overview of federal and state policies and programs with an impact on solar energy development. California once again takes first place among the top states generating electricity from solar power this month. 4% of the United States' total of 24,519 thousand megawatt-hours, according to ChooseEnergy.com's February 2026 solar energy generation report. 18 trillion kilowatt-hours of total electricity at utility-scale power generation facilities, with renewable energy sources contributing roughly 21% of this total and solar power making up 3.

State-supported solar power generation

Solar Energy Generation by State Report February 2026

Discover the best states for solar power production in the country with our February Solar Energy Generation Report. Where does your state rank?

Federal and State Support for Community Solar Growth

Discover federal and state support all clean energy access. Learn about challenges, growth opportunities, drive sustainable energy adoption.

What Are The State Policies Promoting Solar Energy? Key Incentives

From tax credits to rebate programs and net metering, there's a lot happening behind the scenes to support this clean energy shift. I'm excited to explore how these policies work and what they mean

...

Siting Clean Energy: An Inventory of State Policies and Permitting

New report and interactive map provide a detailed look at the diversity of renewable energy siting and permitting regulations and processes across the United States, profiling all 50 ...

Solar Energy Toolkit: The Federal and State Context

Local governments have many tools at their disposal to influence solar energy development. At the same time, decisions made at the federal and state levels set the context for ...

Solar Capacity by State 2026

This report summarizes the latest statistics on solar power capacity by state and highlights the top U.S. states in solar power generation.

The 11 Best and 6 Worst States for Solar

Below is a ranking of the top 11 states in solar energy development, based on their installed photovoltaic (PV) capacity:

**DISTRIBUTED PV
GENERATION + ESS**

The following data comes from:
California continues to lead the ...

Solar State By State - SEIA

California leads as the top solar state. With over 54 GW of solar installed, enough energy to power over 15 million homes. Texas has the fastest growing solar economy with the largest utility-scale solar and ...

**Policies and Regulations , US
EPA**

This page describes the patchwork of federal, state, and local policies and regulations pertaining to renewable energy systems that impact project development.

**Utility-scale solar shines in
Texas despite tariffs, federal
policy**

Texas is now the top state for utility-scale solar power generation capacity.

However, developers of new solar projects face a changing operating environment, one lacking strong federal
