

Stockholm plug-in electric vehicles phevs

Overview

Plug-in hybrid vehicles (PHEVs) captured 26% of the market in March, showing a 14% increase in volume over the same month in 2024. This growth contributes to the robust overall share of rechargeable vehicles, even as BEV growth stabilises compared to last year's levels. As of December 2021, a total of 355,737 light-duty plug-in electric vehicles have been registered since 2011, consisting of 226,731 plug-in hybrids, 120,343 all-electric cars, and. Sweden's passenger car market showed a modest recovery in March 2025, with 24,204 new cars registered, reflecting a 1% increase year-on-year. However, the market remains 23% below the five-year monthly average, underlining lingering challenges in consumer demand and broader economic conditions. The Swedish road vehicle fleet finds itself in a transitional phase, i. In the appropriations document for 2024, Transport Analysis was tasked with producing a knowledge base concerning a large-scale electrification of. The combination of an electric motor with all electrical capabilities and a small onboard internal combustion engine (ICE) for extended-range capabilities is what makes up plug-in hybrid electric vehicles (PHEVs).
