

Telecommunications companies cannot install base stations

Overview

Section 704 of the Telecommunications Act of 1996 prohibits state and local governments from regulating the placement, construction, and modification of wireless service facilities (like cell towers) based on environmental or health concerns if the facilities comply with federal RF. Section 704 of the Telecommunications Act of 1996 prohibits state and local governments from regulating the placement, construction, and modification of wireless service facilities (like cell towers) based on environmental or health concerns if the facilities comply with federal RF. Section 704 of the Telecommunications Act of 1996 prohibits state and local governments from regulating the placement, construction, and modification of wireless service facilities (like cell towers) based on environmental or health concerns if the facilities comply with federal RF safety. Every municipality is responsible for adopting its own set of laws governing the placement, design standards, and safety features of wireless telecommunications equipment installed and/or operated by companies like Verizon, AT&T, T-Mobile, Dish, and Crown Castle. Simplifying the process for upgrading and building macro cell sites, which are vital to enhancing rural and underserved area coverage. Section 6409 of the Spectrum Act and 5G. Base station antennas are installed in such a way that radio-wave exposure in public areas is well below the established safety limits. The base station antennas transmit and receive RF (radio frequency). Telecommunications carriers need to place towers in areas where coverage is insufficient or lacking to provide better service to consumers, while local governing boards and community groups often oppose the siting of towers in residential neighborhoods and scenic areas. The Telecommunications Act.
