

The latest positive news for photovoltaic panels

Overview

Today, the latest solar panel technology advancements have led to panels achieving conversion efficiencies of over 20%, with some even reaching 25%.
By Kelly Pickerel | FebruBy Kelly Pickerel | FebruJoin us at Solar Power World as we cover the world of solar news on technology, development and installation on a daily basis. 14 GW of solar capacity for self-consumption in 2025, lifting cumulative capacity to 9.3 GW, as residential and commercial installations declined while industrial and off-grid segments showed greater resilience, according to data from the Spanish Photovoltaic Union. There are enormous potential and massive opportunities for energy investors; as well as for renewable energy supporters who are striving to achieve SDG 7. Recharge Power secures Taiwanese utility-scale solar-plus-storage EPC: bifacial trackers, liquid-cooled batteries, EMS optimization, grid-forming stability, typhoon-ready build—delivering firm shaped offtake, reduced curtailment, and ancillary-service revenues. CIMIC's Queensland hybrid hub pairs.
