

# The life of the solar rack installation

## Overview

---

On average, solar mounting systems should last at least 25 years, which is roughly the life expectancy for your panels. In order for the final structure to be complete, it is best to ensure that each step is done correctly. Because racking supports one of your most valuable assets (the solar), this section provides instructions for installing the roof rack over rafters, PV tiles and metal tiles. The roof rack can securely hold 12 bundles of metal tiles and 14 bundles of PV tiles on the roof for easy access during installation. Let's make going green easier and more fun! Before you start installing your solar panel rack, it's essential to conduct a. To protect your home and solar system throughout its lifespan, even through rarities like hurricanes or blizzards, having mounting and racking done right by experienced professionals is an important, if maybe boring, piece of going solar. Rails are then attached and leveled before mounting any module-level power electronics (MLPE). The core of a safe installation lies in creating a durable, bonded.
