

The property has installed photovoltaic panels on the roof

Overview

Understanding the process is key for planning its installation on your roof. Solar, or photovoltaic (PV) panels as they're referred to in NFPA 1, Fire Code, are becoming more and more common on one- and two-family dwelling and townhouse roofs. Since the 2016 edition of NFPA 1, access pathways have been required on roofs to facilitate fire service access as well as egress. Solar panels are built to work in all climates, but in some cases, rooftops may not be suitable for solar systems due to age or tree cover. The solar panels are shielded from the elements by the mounting and solar racking system, which can. It's important to consider the pros and cons of solar panels on your roof before you decide if a solar panel installation is right for you. Solar panels offer a compelling mix of environmental benefits and financial incentives. Synopsis: In this installment of Know the Code, code-expert Glenn Mathewson details the commonly.
