

The real income of photovoltaic bracket salesmen

Overview

While a base salary may be offered, the real money is in commissions and bonuses. It's not uncommon for first-year reps to make \$70,000 - \$100,000, with top performers easily earning well over \$200,000 annually. Your hard work is directly rewarded. The benefits are significant for those who are willing to work for them. It's not uncommon. The compensation structure in the solar sales industry typically revolves around a combination of base salary and commission, providing an opportunity for professionals to align their earnings with their performance. Commission Structure Solar sales professionals often enjoy a base. With thousands of reps entering the industry each year, there's a growing curiosity about how much money is really on the table and what makes some solar salespeople earn \$60K while another crosses \$200K. reports say that the average annual pay for a solar sales representative in the United States is \$166,641 a year as of October 2023.
