

The state strictly investigates photovoltaic panel scams

Overview

An aerial view of existing homes with solar panels near new homes under construction in the Chatsworth neighborhood in Los Angeles, California. The scams vary, but here's the gist: someone claiming to be with the government or your utility company promises big savings on your utility bills from solar energy. The residential solar energy industry has expanded significantly over the past decade, multiplying the number of companies serving consumers. At the same time, federal and state regulators have received an increase in consumer complaints about a small number of unscrupulous solar companies. Here are three common solar scams to look out for, how to avoid them and how to report solar scams. There are no federal government giveaways for. Solar panel fraud has become a growing concern in the United States, leaving many homeowners stuck with hidden fees, inflated energy bills, and contracts they never fully understood.
