

# Toyota Solar Power Generation Installation Plan

## Overview

---

Power plant details for Toyota HQ Plan, a solar farm located in Plano, TX. The map below shows the six types of RE projects that we have invested in as of October 2025. 1 Carbon neutral at our facilities means we aim to reduce our Scope 1 and 2. TerraSol Energies recently completed a solar + storage project for Team Toyota of Glen Mills, Pennsylvania. The installation features an 820-kWh Fortress Power eSpire commercial energy storage system paired with a 700-kW solar array. The new system will help Team Toyota save over \$2 million in. New solar project with partners Onyx Renewables, Sol Systems, and Nelnet Renewable Energy to meet 85% of Toyota Boshoku Illinois' energy needs while supporting local jobs and ecosystems Lawrenceville, Ill. Over the course of a 15-year power purchase agreement (PPA), this distributed generation system will fulfill 85% of the electricity needs at Toyota. Toyota's Frontier Research Center is involved in various research projects. The advantage of this system is that by adding the function of solar panels to a sound barrier on a highway, for example, it enables.
