

# Vienna battery testing

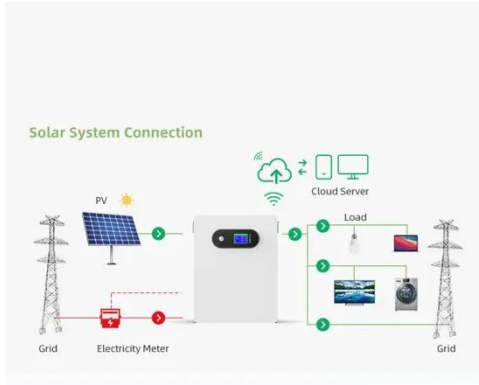

## Overview

---

We can provide expert testing services for abuse, benchmarking, durability, electrical, electromagnetic compatibility (EMC), environmental, life cycle analysis, performance, safety standards and transportation on cells, batteries and modules. AIT researchers at the Battery Test Laboratory are specialists in both performance validation and safety testing. We are a recognized partner to the automotive and battery industry and offer a range of testing services for the inspection of cells, modules and entire battery systems, from 48 V-mild hybrid batteries to those weighing more than 1,000 kg that power full electric cars. Our scientists address the entire development chain, ranging from basic research on material optimisation to sustainable. SGS battery testing services can identify your target market regulations for cells, batteries and modules to ensure compliance with contractual or regulatory requirements.

## Vienna battery testing

---

### Battery Test Laboratory

In the battery test laboratory, batteries are examined in detail at cell, module and system level. This includes electrical tests, as well as an evaluation of safety through misuse tests.
