

# What are the states of smart microgrids

## Overview

---

Of the 692 microgrids in the United States, most are concentrated in seven states: Alaska, California, Georgia, Maryland, New York, Oklahoma, and Texas. The quarterly series provides insights on state regulatory and legislative discussions and actions on grid modernization, utility business model and rate reforms, energy storage, microgrids, and demand response. The report finds that 48 states, as well as the District of Columbia and Puerto Rico, commercialization. Think Microgrid's research finds that even states that have taken dedicated approaches to microgrid policy and regulation have struggled to create attractive environments for diverse, scale capital deployment. It suggests a clear need for state, community and industry leaders. Authorized by Section 40101(d) of the Bipartisan Infrastructure Law (BIL), the Grid Resilience State and Tribal Formula Grants program is designed to strengthen and modernize America's power grid against wildfires, extreme weather, and other natural disasters that are exacerbated by the climate. Microgrids provide less than 0. electricity, but their capacity has grown by almost 11 percent in the past four years. NRRI's primary mission is to. National renewable asset microgrid capacity is expected to grow 3. 5 times, bringing total to 32,470 MW by 2030. Microgrid assets are a powerful engine for change, not only for our environment and for resiliency, but also for our economy.
