

# Where are the most photovoltaic panels made

## Overview

---

China produced 78% of the world's solar panels in 2024. The reason they dominate is because the Chinese government realised the world would need large amounts of solar PV and encouraged investment in large-scale solar manufacturing. Other countries could have done the same but didn't.

**Manufacturing Renaissance Driven by Policy Support:** American solar manufacturing has reached a critical milestone in 2025, with domestic factories now capable of producing enough panels to meet nearly all U.S. demand. China, Vietnam, Malaysia, and India manufacture 89% of the world's solar panels. It's not surprising that top solar panel manufacturers are in the business of harvesting solar energy, as it is one of the best renewable energy sources on earth. Solar energy is not only renewable but also unlimited, clean, and available everywhere around the globe. Vietnam took. The U.S.

### 10 Top Solar Panel Manufacturers Worldwide [Updated 2025]

The Global Supply Chain A Growing Market For Solar Manufacturers Does It Matter Where You Buy from? You will be hard-pressed to find an American solar manufacturer whose supply chain never leaves the United States, any more than you can buy a purely American-made car. Beyond questions of the quality of materials, there are ample reasons to care about the origins of any solar panel that you may buy. Some of them are ethical or social, such as supply.
